ABOUT ME

I am a passionate and motivated front end developer with hands-on experience in creating several dynamic and responsive websites using HTML, CSS, SASS, Bootstrap, and jQuery. My strong foundation in front-end technologies allows me to design and implement user-friendly interfaces that enhance the overall user experience. I have successfully developed a variety of projects, including personal portfolios, landing pages, and interactive dashboards, showcasing my ability to translate design concepts into functional web applications.

PROJECTS

Recipe Book Development using React JS

[GitHub](#)

- Designed and implemented the user interface using React.js, ensuring a seamless and intuitive user experience.
- Developed the Client-side using Redux and Rounting, including RESTful APIs for managing product and user data

Ecommerce Website Development using React js

- Designed and implemented the user interface to closely replicate the Flipkart website using React.js, ensuring a seamless and intuitive user experience.
- Developed the client-side using Redux for state management and React Router for efficient routing. Integrated RESTful APIs to manage product and user data, ensuring smooth interaction and functionality across the platform
